The OnPar Report

"Technology Tips to Transform Your Business"

OnPar Technologies Joins Sponsor List for the REX Hospital Open

Raleigh, NC - May 3, 2018. OnPar Technologies hosted a REX Hospital Open Sponsorship party on May 3, 2018 at Kings Bowling North Hills in Raleigh, NC. OnPar Technologies is just one of the newest sponors to join the REX Hospital Open golf tournment that is occuring May 31-June 3 at the TPC Wakefield Plantation.

UNC REX has been supporting charity golf in the Triangle for over 30 years. The tradition has generated millions for charity initiatives at UNC REX.

This year, all tournment proceeds will support the Neuroscience Service Line Expansion at UNC REX Healthcare. Raleigh is located in what is considered the buckle of the stroke belt and the demand for more specialized neuroscience services is increasing. Tournment funding will support state-of-the-art facilities and 24/7 care provided by specialty trained physicians, nurses and ancillary staff.

These investments will help the Raleigh community get the specialized care they need when confronted with stroke, aneurysms, traumatic brain injury, epilepsy and other neurological diseases. The REX Hospital Open continues to provide a world class sports experience for Raleigh citizens as well as giving back every year to the community we live in.
OnPar Technologies is thrilled to partner with the REX Hospital Open this year and contribute to the needs and success of this years charity.

OnPar Technologies will be sponsoring the 18th hole at the Pro-Am on Wednesday May 30, 2018. If you are attending the golf event, please be sure to stop by our tent to say hello and pick up some free swag.

OnPar's Customer Appreciation Night

OnPar Technologies hosted a customer appreciation night on May 3, 2018 at the Durham Bulls Stadium! Thanks to all the clients and staff that came out for food and baseball fun!

Our Featured Case Study: Pharmaceuticals Services Company

Silo-ed Communication: Bringing Together Employees Through Email Migration & SharePoint Implementation

Business Challenge

OnPar recently worked alongside a pharmaceutical services company that provides specialty services for pharmaceutical and biotech industries. This particular company has staff located across Europe with offices in the US and UK. With staff in two countries, it was imperative that they were able to effectively communicate and collaborate.

Prior to signing on with Office 365, the company had been utilizing different platforms to conduct daily office operations. This made access to files and company information very difficult for their employees. Due to multiple systems, they experienced challenges with collaboration between offices, and siloed communication.

Due to their continued growth, they needed a product that was reliable and easy-to-use because their current solutions weren't as scalable for future growth.

Solutions

To alleviate the pain points, OnPar Technologies migrated their emails, contacts and calendars to Office 365. They then provided information to employees on how to change their email accounts from Google to Microsoft on their mobile devices.

OnPar provided post migration support and training for the migration. In addition to email migration, OnPar implemented a company intranet with SharePoint. This implementation included an envisioning call with the team, logo setup, custom color, branding, 2 subsites, applications on each page, the initial setup and establishment of company permissions, and finally training on SharePoint for all admins and end users.

Results

As a result of OnPar's Office 365 setup, they have now been experiencing greater collaboration amongst staff. They also now have an opportunity to further evolve due to the suite of Microsoft products and all pertinent information being housed in one location that can be accessed in the US and UK.

With OnPar as their new IT provider, they no longer have to go through various hoops to get new Microsoft licenses and are experiencing the convenience of utilizing a top Microsoft license provider.

Worried About Your Company's Digital Credentials?

28,500. That's the average number of data records per company, including credentials, that are compromised during a data breach.

Our Dark Web ID Credential Monitoring Detects compromised credentials in real-time on the Dark Web and notifies you immediately when these critical assets are compromised, before they can be used for identity theft, data breaches, or other crime. Digital credentials such as usernames and passwords connect you and your employees to critical business applications, as well as online services. Unfortunately, criminals know this — and that's why digital credentials are among the most valuable assets found on the Dark Web.

Cybersecurity doesn't have to be too overwhelming, expensive or complicated. The first step to protecting your business is understanding your risk.
